

Steps to follow to stock sterile grass carp:

Western Cape:

1. Please read the information supplied on this web site about the practical use of grass carp
2. Fill in the on line quote/order form or download and fax us a completed copy (Please fill in the form as accurately as possible) Your ID number and GPS coordinates is essential for the permit application. If you do not have the GPS coordinates, a good description of the location in the text box of the on line form, will enable us to acquire the coordinates on Google Earth. The identification of the type of weeds in your dam can be done on the aqua plant website.
3. We shall provide you with a quote and stocking model, based on the information supplied. A copy will be sent to Cape Nature Conservation Services, accompanied by a permit application.
4. Once a permit has been issued, we shall contact you to finalize the order and stocking procedures.
5. A final vat invoice will be issued.
6. Once we have received payment, the order will be processed and the fish delivered.

Other Provinces:

1. Please read the information supplied on this web site about the practical use of grass carp
2. Fill in the on line quote/order form or download and fax us a completed copy (Please fill in the form as accurately as possible) Your ID number and GPS coordinates is essential for the permit application. If you do not have the GPS coordinates, a good description of the location in the text box of the on line form, will enable us to acquire the coordinates on Google Earth. The identification of the type of weeds in your dam can be done on the aqua plant website.
3. We shall provide you with a quote and stocking model, based on the information supplied.
4. The stocking model and the accreditation documents (supplied on our website) must accompany your permit application to your province. (Some provinces use the standard application and others have their own permit application.)
5. Once you have been issued with a permit from your province, you must please send it to us.
6. We shall forward the permit to Western Cape Nature, to obtain a travel permit, (This usually takes one week.)
7. Once a Cape Nature Travel Permit has been issued, we shall contact you to finalize the order and shipping arrangements. We usually fly the fish to your closest S.A.A. airport.
8. A final invoice will be issued.
9. Once we have received payment, the order will be processed and the fish shipped.
10. Our fish are guaranteed to reach you in a healthy state within 24 hours after packing.

General

- Between 13 and 77 fish are packed per box, depending on size
- Box size is 27cm X 35cm X 64cm
- We make use of the company, Animal Travel, to ship the fish
- Releasing instruction and permits accompany the fish
